

### **Return Time Changes:**

Using a cellphone that does SMS texting, you can update the return time remotely. Rather than use 479abc, get the real password from the scoutmaster before the trip.

(If this is the only active event at this time, you can skip steps #1 and #2)

1. Send a text message of: [ TROOPKIT 479abc ] to **41411**
2. Read the text response to find the number of your event. (probably #1, but maybe #2)
3. Send a text message of: [ TROOPKIT 479abc 1 hh:mm ] to **41411**  
(of course hh:mm is the new return time)  
If the date changes too, add mm-dd-yy to the end of your text...  
For example: [ TROOPKIT 479abc 1 11:30 12-27-09 ]
4. Read the text response to see the updated time.
